

# Miller CTC Return to Campus

# Distance Learning Strategy

CTCs are a very hands on and community based programs focusing on work skills and life skills

When campuses closed we immediately went to work on making the Life Skills portion of our curriculum digital

District issued iPads were integrated into our program to give Interns the opportunity to access that new digital curriculum

We have offered classes in Independent Living, Social Communication and Career Awareness throughout the campus closure and into the Hybrid program

# Traditional Vocational Workspaces Transformed to Classrooms

Specialized spaces like our Bakery have been transformed to socially distanced classrooms

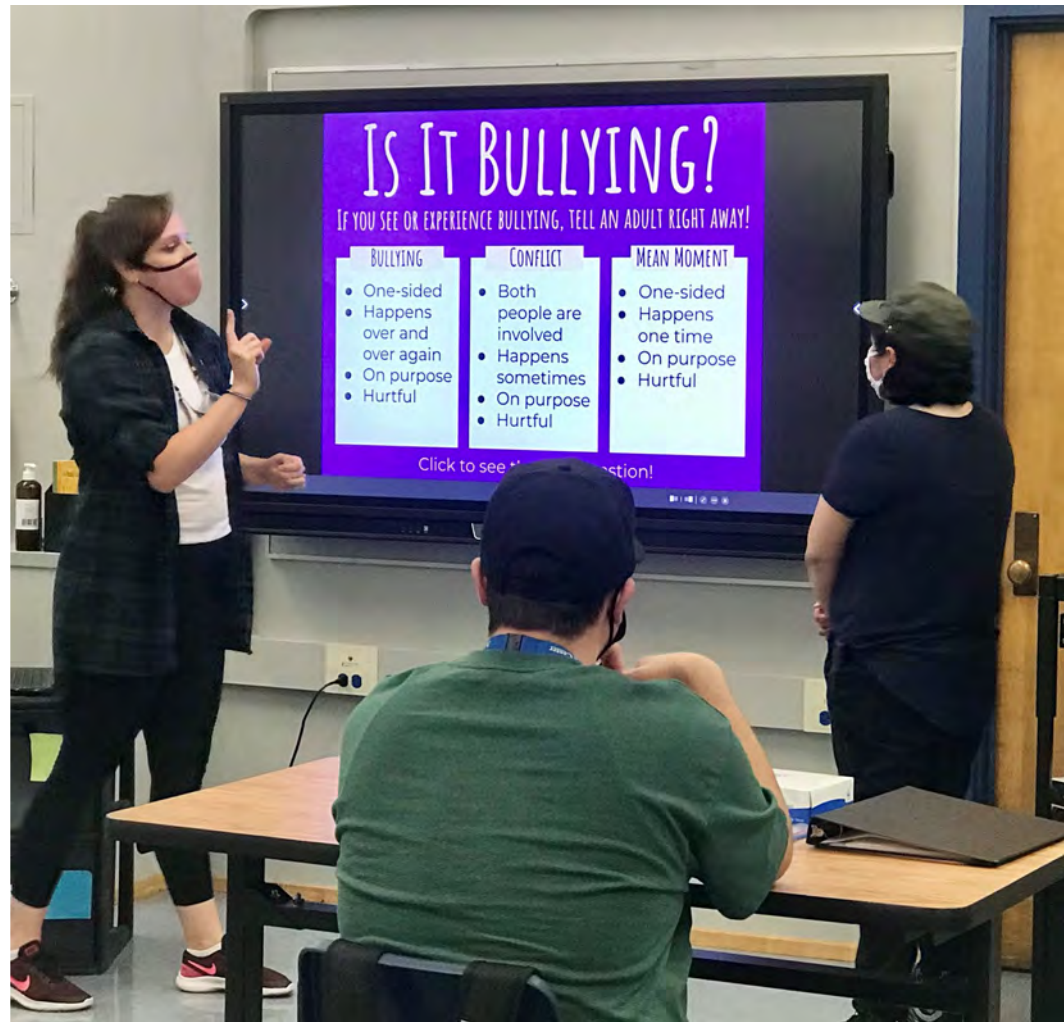

## Social Distancing

Every classroom has been laid out to ensure 6 feet between people at all times.

# Online Digital Becomes In Person Hybrid

Teachers are using the same curriculum Online Interns use but accessed through on site technology

## Success Story

Destiny is a former Miller Intern who was randomly hired by the contracting company providing additional sanitation service to the school
